

EARTHQUAKES AND TSUNAMIS

What You Need To Know

EARTHQUAKE

Drop, cover, and hold on until the shaking stops.

This is your warning of a local tsunami!

INUNDATION ZONE

For a **Distant** Tsunami, the inundation zone is very small.

For a **Local** Tsunami, see the map on reverse – find YOUR Location.

Know & practice your evacuation route.

DISTANT TSUNAMI WARNING

- ➡ You have four to twelve hours between a distant earthquake and a tsunami hitting our shore.
- ➡ Plenty of time to get warnings from emergency personnel.
- ➡ Only bays, beaches and beachfront need to be evacuated.*

NEWS AND INFORMATION

- KCCB/KMUN 89.5/91.1 FM
- Emergency Public Info 503-368-2050
- NOAA Weather Radio*
- Emergency Volunteer Corps
website: www.evcnb.org
- Sign up for Reverse 911 on your cell phone, to receive text message warnings.
- Facebook—"Emergency Volunteer Corps of Nehalem Bay"*

EVACUATE – Do I or don't I?

- ➡ Is building unsafe?
- ➡ Am I in the inundation zone?

IF YES to EITHER –

Grab your Go-Kit.*

Go to nearest assembly area.

Return only after "All Clear" is announced.

IF NO to BOTH, STAY PUT,

TSUNAMI – Local or Distant?

LOCAL (Earthquake right off shore)

The earthquake you feel is the tsunami warning.

See above for evacuation info.

Roads will be impassable.

WALK, DON'T DRIVE.

DISTANT (Earthquake far from here)

You have time!

Evacuate beaches and low-lying areas.

Return only after "All Clear" is announced.

IMPORTANT!

**Tsunami surges are MULTIPLE.
Surges continue for HOURS.
Surges may get BIGGER OVER
TIME.**
