

Yellow Radio Educational Moment
Different Zone Check-In
Yellow Radion Net 8-9-2018

We all know that in an disaster/emergency situation we first tune to our zone channel. But if you are out of your zone and within the Nehalem Bay area what should you do? If you have your radio with you, tune to the channel for the zone where you are. You can check in with the zone and let them know that you live in another zone.

Here's an example conversation:

You say: Zone 4 Net Control, this is John from another zone.

Net Control replies: Go ahead John

You say: This is John Q, from zone 2 checking in to zone 4

Net Control replies: Copy that John Q from zone 2.

This procedure could be used in a disaster-type situation, and also for our Thursday, Yellow Radio practice sessions.
